THE GEORGE HULL EARLYON PROGRAM DESCRIPTIONS

Family Drop-In
(Birth to 6 years of age)

A wonderful opportunity for children and their family to participate in early learning activities and to enjoy the use of play materials, equipment and resources. This program is designed to encourage quality adult and child interactions in an age-appropriate, child-focused environment that enhances and promotes healthy child development

Baby's World
(Birth to 18 months)

This program welcomes parents/caregivers to experience the joy of sharing songs, rhymes and musical activities with their infants. Families will have the opportunity to socialize, ask questions, and share helpful hints or strategies with each other while spending quality time with their babies. This program offers resources and services available within the community.

Dad's and Kids
(Birth to 6 years of age)
*(Registration required)

This special program offers fathers' the opportunity to engage with other dads. They will be able to network with others and share new experiences, ideas, concerns, and their expertise as fathers. This interactive program enhances and promotes healthy child development by providing activities to enhance skills in all areas of development.

123 Let's Move (Indoor Movement)
(Birth to 6 years of age)

The focus of this program is all about using our large muscles. We will be working on mastering gross motor skills like dancing, balancing, jumping, kicking and running. It is also a great way to burn off that extra energy.

The Growth Space
Black Families Drop-In

The Growth Space program is an EarlyON program designed specifically for families with children ages 0–6. Through music, food, storytelling, and art, families are invited to connect, build community, and celebrate the beauty, diversity, and richness of the African-descent experience.

Learning and Growing Together for
Black Families Drop-In

A wonderful opportunity for Black children and their families to participate in early learning activities and to enjoy the use of play materials, equipment and resources that are culturally relevant. This program is designed to encourage quality adult and child interaction in an age-appropriate, child focused, and culturally appropriate environment that enhances and promotes healthy child development.

Sensory Play
(Birth to 6 years of age)

This program welcomes children and their families to experience play through the use of their senses. Each week we will focus on one sense such as tactile, sound, sight, smell, taste as well as vestibular (balance) and proprioceptive input (using muscles). Children will have the opportunity to enhance their senses through crafts, group time with songs and finger plays and age appropriate activities.

The Sensory Lab
(2.5 - 4 years of age)
*PRE-REGISTRATION REQUIRED

Come and explore simple science concepts with your little one using our five senses-sight, sound, taste, smell and touch. This interactive program will encourage you and your child to have fun together through hands-on sensory activities while developing fine motor skills, following directions, and creating memories.

Deaf and Hard of Hearing Program
(Birth to 6 years of age)

Join Bob Rumball EarlyON staff at the George Hull EarlyON!

Connect with deaf and hard of hearing children in the Etobicoke area. It's a wonderful opportunity to connect, play and access helpful resources - all in a welcoming space where others understand your experiences.
